Subject: GE Evendale - EPA Example of RSL Calculations
Attachments: TCE RSL Soil_Outdoor_Worker_GE Values Appendix B_chem_13AUG2015_prg19765.pdf

TODD:

As a follow-up to our conference call with GE this afternoon, please find attached the Output from the calculation of Site-Specific Screening Levels using Trichloroethylene as the example constituent. As discussed on the call, this was my attempt to incorporate the GE site-specific input parameters into the EPA Screening Level Calculator for the "Outdoor Worker" scenario (<https://www.epa.gov/risk/regional-screening-levels-rsls>).

GE wants to use this Output for comparison to their calculations of Soil Cleanup Objectives for Trichloroethylene.

I understand that you will forward this information to GE for their review. – Thanks.
